## **SONIQ Uniformity**

**Ultrasound Phantom** 

SONIQ Uniformity allows the user to test linear, curvilinear and intra-cavity ultrasound probes (transducers) for common defects such as damaged transducer elements or cables. Such defects will produce non-uniformities in a uniform phantom.

## Accessories:

- Background Rod
- Anechoic Rod

Speed of sound approximately 1000+/-50 m/s Attenuation 1+/-0.1 dB/cm/MHz
